

# THE LEGACY OF H.I.M.

76<sup>th</sup> IHIMA ANNUAL MEETING & EXHIBIT

APRIL 22<sup>ND</sup> & 23<sup>RD</sup>, 2024

## IHIMA24 Highlights

## Feedback from IHIMA24 attendees:

This was my first IHIMA conference, so I had nothing to compare it to. Overall, it was informative and enjoyable. I think the giveaways were great.

This was my first time attending an IHIMA meeting. Very informative in the Leadership tract.

Great conference overall!

Thanks for putting on another great meeting!

The 2-day format was excellent; the technology during the virtual session worked perfectly - very easy to join and transition to another session.

Great job IHIMA board and planning committee.

I hope to be invited again to speak at next year's annual meeting & exhibit. IHIMA consistently provides excellent educational speakers and current HIM information for healthcare professionals.

Loved it!

Well planned 2 days! Great job!

Joseph Ours was a good speaker with good content. I liked being able to switch Tracks.

Dr. Kennedy was great! Overall, the presentations were very informative.

"The venue served the size of the audience; location was good and easy to locate. The IR speaker was engaging and the fact she did the book drawing was a nice touch."

I learned a lot about AI...especially the mental health connection. I learned that release of information forms can be overwhelming to general public, and I also learned the importance of accurate coding as the inaccuracies lead to denials.

Always learn something new.

The Chat GPT presentation was fascinating and I learned so much!

Mark Swearingen always provides great information.

I learned clearer information on critical care documentation and coding.

The IR coding session was great, and I learned a lot from Dr. Kennedy's presentation. IR was good because we aren't doing a lot of it at our facility right now but we will be, and I like Dr. Kennedy's because he shared some upcoming coding info for FY 25 which was very nice.

The session about privacy and reproductive health was very interesting.

Found the cardiac presentation very informative!

Learn a lot about the reproductive laws and the difficulty it creates for ROI staff.

AI for psychology was the most enlightening session.

Absolutely loved the cardiac presentation and the aneurysm presentation

AI was interesting to learn about.

I really enjoyed the Patient Health Literacy.

I enjoyed learning more about Annual Wellness Visits and how to appropriately code and document these services.

The outpatient sessions were very educational.

Great presentation on AI Revolution and Reproductive Health Privacy update.

I work with Oncology accounts and the new codes that were shared by Doctor Kennedy were very helpful.

Michelle Barrett was amazing, and I learned a lot about appeals.

The HIPAA update was great, and the AI presentations were very insightful.

Really liked the AI, lots of new information on emerging technology.

The IR Coding presentation was excellent.

HIPAA content was excellent.

I love how all the speakers were enthusiastic about their presentation.

Mark Swearingen, as usual, provided a great presentation. Joe Ours was my favorite, he was informative, and he is an engaging speaker.

Great content!

The content was good. In particular, the Utilization Review Basics for HIM & ChatGPT.

The content was spectacular because it varied. All HIM professionals could learn about Inpatient Coding, Outpatient Coding, and/or Leadership.

Very timely presentations and topics were different from previous years.

Great content. I am glad we have access to all the presenters' slides because there were a few presentations that ran at the same time and I could not listen to both at the same time.
